DEDICATION

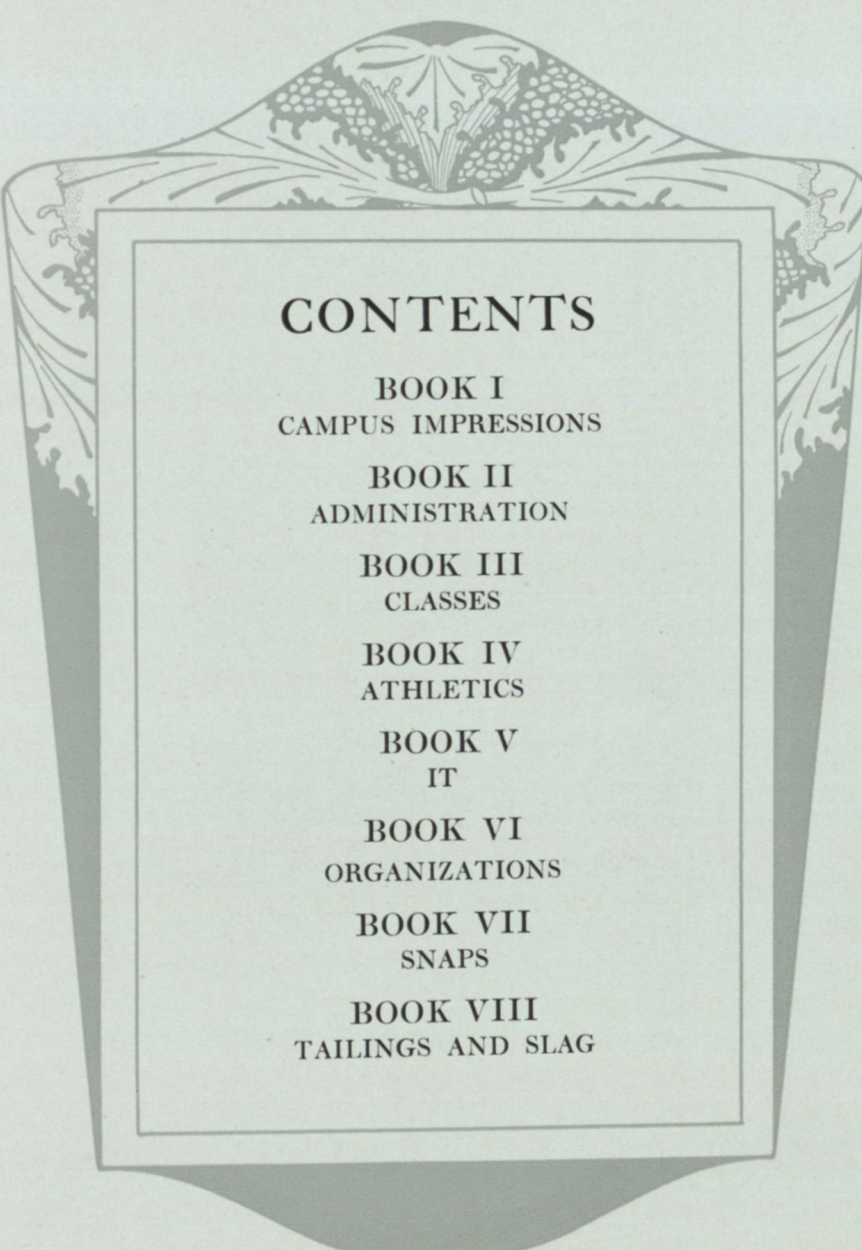

To the best friend of the whole student body
BERTE ROLPH HAIGH
who is always ready to sacrifice himself to help
us, in appreciation of his devotion, we
respectfully dedicate the
FLWSHEET
for 1934

FOREWORD

It is the purpose of this, THE FLOW-SHEET of 1934, to perpetuate a most outstanding year at the College of Mines and Metallurgy. A year which has marked the beginning of a new era in our college as well as in the whole nation, for it has seen the accomplishment of various long-dreamed-of improvements, both in campus and curriculum which have definitely shown us that the fog has lifted and we are on the road to better times.

THEME

THE ROMANCE OF ENGINEERING

Engineers are the vanguard of civilization always. We find the active influence of some branch of engineering in every industry. Mining, civil, electrical, chemical, aeronautical, mechanical, architectural, and construction engineering form the foundation and core of advancement. In this period of reconstruction, the engineer is in possession of a romantic enterprise. He must both dream and create. He will restore our past progress and push into fresh fields. There is always something new beyond the horizon for the engineer.

The spectacular operation of tapping an open hearth furnace which is used for smelting iron and steel.

FLOWSHEET

The Campus from a Distance

Apex of luxury in air travel — the new Douglas Airliner. This machine has a top speed of 215 miles per hour, and a 30,000 foot ceiling. It is practically noiseless, having a noise level of 70 decibels, five below that of a Pullman car. The wheels are folded into the fuselage for greater aerodynamic efficiency.

ADMINISTRATION

The President of the College of Mines and Metallurgy
MR. JOHN G. BARRY

THE BOARD OF REGENTS

Chairman of the Board of Regents.....MR. BEAUFORD H. JESTER, Corsicana, Texas
Vice-Chairman of the Board of Regents.....MR. H. J. LUTCHER STARK, Orange, Texas

MEMBERS

DR. K. H. AYNESWORTH.....	Waco, Texas
MR. CHARLES I. FRANCIS	Wichita Falls, Texas
DR. EDWARD RANDALL.....	Galveston, Texas
MR. J. T. SCOTT.....	Houston, Texas
MR. L. J. SULAK.....	La Grange, Texas
MR. LESLIE WAGGENER.....	Dallas, Texas
MR. H. H. WEINERT.....	Seguin, Texas

COMMITTEES

(First member named in each Committee is Chairman of that Committee)

Auditing Committee: Sulak, Scott and Waggener.
Building and Grounds Committee: Stark, Weinert and Randall.
Complaints and Grievances Committee: Aynesworth, Francis, and Waggener.
Executive Committee: Jester, Waggener, and Stark.
Finance Committee: Waggener, Francis, and Scott.
Land Committee: Francis, Stark, and Weinert.
Legislative Committee: Francis, Sulak, and Randall.
Medical Branch Committee: Randall, Aynesworth, and Weinert.
College of Mines and Metallurgy Committee: Weinert, Aynesworth, and Jester.
Public Relations Committee: Scott, Sulak, and Stark.
Members of Board for Lease of University Lands: Francis and Jester.

JOHN GERALD BARRY, S. B.
President of the College

ADDRESS FROM PRESIDENT BARRY

THE FLOWSHEET this year is planned to depict the "romance of mining" There is no career open to young men which lures with more adventurous prospects. Travel, out of the way places, new conditions, congenial companions, freedom from conventional restraint, possible wealth, all beckon. This is all true, but—! From twenty-five years experience of the life may I sound, not a note of discouragement, but an important consideration. There is such a story book glamour that some are caught by it who do not weigh the payment early enough. Be sure that you have within yourself the resources to live alone, to take sole responsibility, to meet situations where there is no one to lean upon; and, upon the other hand, that you can mix with all sorts and kinds, your own nationality, foreigners, high and low, and find them good. There is variety, change, great interest and experience open to the man who because he likes engineering is willing to endure hardships, unlimited working hours, loneliness, danger, and separation from family and urban life. It is not a life of play boy adventuring. The real romance of mining is hard work, stimulating, invigorating, and broadening to the man who likes mining and creative efforts.

John G. Barry
President
College of Mines & Metallurgy

CHARLES ALEXANDER PUCKETT, M. A.
Dean of Arts and Education

ADDRESS FROM DEAN PUCKETT

The College has been able to continue its work in all of the essential academic fields. The courses needed to serve the interests and needs of the students have been maintained. Standards have not been lowered.

Students and Faculty are to be congratulated upon the results of their efforts.

A handwritten signature in dark ink, appearing to read "C. A. Puckett". The signature is fluid and cursive.

Dean of Arts and Education

JOHN WILLIAM KIDD, E. E.
Dean of Mining, Metallurgy and Science

ADDRESS FROM DEAN KIDD

The session of 1933-1934 has offered encouragement to the Engineering Division of the College. There is a decided improvement in the general outlook for Engineering students. A considerable number of requests are being received asking for the services of Engineers, and it is indeed a great satisfaction to know that nearly all of our Engineering graduates are employed in some line of work.

Substantial improvements have been made during the past several months, and work of this nature is being continued. Some of the most needed of the improvements that might be mentioned are: new quarters for the Library; outside painting of nearly all of the College Buildings; completion of the new building for athletics, (Holliday Hall); the conversion of the Dormitory building into classrooms, offices, and other purposes; the construction of adequate driveways; and the improvement of the athletic field.

We are hopeful that the many changes that have been made will induce the next Legislature to make provision, if possible, for some additions to the physical plant that we could not undertake with the limited funds at hand during the present bi-ennium.

Sincerely,

John W. Kidd
*Dean of Mining, Metallurgy
and Science*

QUIZZES OFFERED TO STUDENT ENGINEERS

For Metallurgists (S. Wimpfen)
Tragedy No. 13131313

1. Place a number of ingots of bab-bit metal, zinc, lead, etc., in a large crucible.
2. Heat vigorously. When white hot dip forefinger of right hand into the solution to estimate the temperature—obviating the use of a thermocouple. Withdraw finger slowly.
3. Look the instructor in the eye while testing the temperature to show him how you can take it.

Report:
How many months did it take before you could write again and how many fingers have you now. Give your testimonial for Ungentine for minor burns.

For Civil Engineers (N. Highfield)
Traverse No. 131313—

- Directions:**
1. Check out a transit.
 2. Do not take the tripod. It is unnecessary.
 3. Sight the transit at the rod like a telescope.
 4. Hold the same in the left hand and record observations with the right.
 5. Attribute any and all errors to the slide rule.

Conclusions:
If you were surveying a plot for a pansy bed how many months would it take you? Report the diameter of the cross-hair in your instrument.

For Chemical Engineers (B. Mack)
Experiment 13—
Prepare about one pound of nitrogen tri-iodide.

2. Place in a large mortar.
3. Allow to dry well on a sand bath.
4. Place in far corner of laboratory. Caution!
4. Throw 1 inch steel ball bearing at the mortar from the doorway. Aim carefully. RUN LIKE HELL!

Report:
Show diagram of building before and after the experiment took place. Record the seismograph readings observed at Madison and Chicago. Summarize your interview with the coroner. Record the testimonials of the survivors, if any.

Conclusions:
Submit a tentative budget of a new building for the approval of the regents. Suggest methods of obtaining more accurate data.

For Mechanical Engineers (M. Sobral)
Experiment 1313—

PART I

- Laboratory Work:**
1. Verify the presence of a good head of steam in the supply lines.
 2. Adjust governor of the Corliss engine to care for very heavy overloads.
 3. Remove belt driving the governor.
 4. Open steam valve wide—also the front door.
 5. Do a 440—OVER THE FIELD HOUSE.

PART II

1. Never mind Part I.
- Report:**
Measure the dimensions of the holes in the walls of the laboratory. Record your guess of the number of spokes that were in the flywheel. Compute

the efficiency of the engine for the museum files.

Conclusions:

Don't you think steam and gas is fun? How would you like to come over and play again some time?

For Electrical Engineers (J. Heuser)
Experiment No.—Last.

1. Obtain a new cadmium standard cell. Record its voltage. (Three decimal places).
2. Connect a clean copper wire across its terminals—Remove the wire three days later.
1. Use this cell in a potentiometer circuit for your experiment.

Report:

After throwing away the data write all you know about a standard cell. Hand in your paper to the Custodian of the Waste Basket. Please pay for cadmium cell on your way out.

The Marebanks Force Diesel Engine
For Graduate Engineers (R. Estes)
Experiment No. 1934—

1. Start the Marebanks Force Diesel engine by priming the gaskets with banana oil.
2. It is essential that the excitation of the ignition be kept low enough to prevent overheating from eddy currents. Therefore adjust the excitation to give a leading power factor not greater than the angle between the compression time and the brake arm.
3. After the head has reached the top of the glass see the instructor and give all the reasons for the presence of the large hole in the concrete floor.

—The Wisconsin Engineer.

Among those graduating in June whose pictures do not appear in this Annual are:

FRANK BENNETT..... *Bachelor of Arts* (Economics Major)
ERIC JOE BYMARK..... *Bachelor of Arts* (Eco. and B. A. Major)
EDWIN CADY..... *Bachelor of Arts* (Eco. and B. A. Major)
MRS. HELEN H. FITZPATRICK..... *Bachelor of Arts* (Education Major)

The hub of the water wheel generator for the Dnieprestroï Dam in Russia. This hub was made by General Electric, and weighs ninety-two tons. Note its size as compared to that of the man beside it.

ATHLETICS

CHARLES ALEXANDER PUCKETT, M. A.

Our athletic teams are to be congratulated, first, upon the creditable consummation of some of the most difficult schedules of games the College has attempted; and, second, upon the completion of the gymnasium and the stadium. Both of these accomplishments should mean much to our athletic teams in the future.

Chairman Athletic Council

MACK SAXON
COACH

Although his fifth year at the Mines has not been so successful as previous years, Coach Saxon has more than ever endeared himself to sports lovers at the College. Coach, in spite of lack of a good quarterback and sufficient reserves, put up a mighty fine football team this year, and talk that he may leave should arouse us to action in order to prevent such a misfortune.

The Freshman rule is really going into effect next year, and Coach Saxon can now devote his time to building up a real conference team. Saxon is also conducting an intensified spring training in football this year, a thing which will effectively increase the fighting strength of his team.

It is rather amusing to note that at the Texas Tech game there was personal rivalry between the coaches, as Mack was a former pupil of Coach Cawthon. Cawthon says that when Mack first came to play for him—well, you've heard it.

Okay, Coach! Let's go! Let's see us a Conference team next year.

HARRY PHILLIPS
ASSISTANT COACH

In point of players, Mack's little assistant, Harry, had the better of his chief. This past year, "Little Man" built up a forward wall that took Texas and S. M. U. to blast away. Phillips is one of the most able line coaches in this section of the country; and should he leave us, his absence would be severely felt.

Well, Harry, how about the Conference team next year?

FOOTBALL SQUAD 1933

BACK ROW : The Managers, Al Washburn, Watty Brennerman, Hugo Sacra.

MIDDLE ROW : Coach Harry Phillips, Clarence Walker, Frank Kirby-Smith, J. B. Walton, Woodrow Wilson, Homer Barnett, Joe Hart, Campbell Weaver, Garvice Pou, Seldon Kirby-Smith.

FRONT ROW : George Krutilek, Walter Milner, Tony Hernandez, Captain Lindy Mayhew, Frank Feuille, John Williamson, Winston Newberry.

Those not appearing in the picture are :

Head Coach, Mack Saxon; Assistant Coach, J. B. Andrews; Assistant Coach, Charles Coldwell; Fred Lingdren; James (Primo) Daross; Lionel Andrews; Al Williams; Carrol Weaver; Allen Wilkenfeld; Cotton Duffel; Sam Cresap; Roxby Oliver; Jessie Hunt; Clarence Thomas; Lee Barnett.

Yell Leaders Joe Lynch and Marion Ellis

FLOWSHEET

CAPTAIN LINDY MAYHEW

Captain Lindy is the powerful type of guard weighing over two hundred pounds. Being fast on his feet, he is a constant menace to the enemy. He was in the opponents' backfield so often the officials would frequently question him to see whether or not he was wearing the right colors. During the past season he played almost every position on the team. His leadership could not be surpassed and his graduation this year is leaving a place mighty hard to fill.

GEORGE KRUTILEK

Krutilek is considered as the most versatile player on the squad. At some time or another he has played every position on the team. The past year he was run mostly as a blocking back, earning his letter because of his drive and fire. He still has another year and his experience should go a long way towards building a championship team.

AL WILLIAMS

The last year was Al's fourth and most creditable year on the Mine's squad. He has played almost all of every game and has earned the nickname of "Iron Man," because of his fighting spirit and willingness to play even when he was crippled. Often, the team would have some harmful tense situation broken by one of Al's cracks.

CARROLL WEAVER

Weaver was a stellar performer this last year and is feared as one of the hardest tacklers of the game. He generates so much power that in an open tackle there is almost always an injury, either to his opponent if he connects, or to himself if he misses. However, he connected often enough so that he did not miss any games because of injuries. If he is eligible he should be outstanding next season.

Leonard Chant

Bates Belk

JAMES "PRIMO" DAROSS

Primo gets his name from his size. He weighs around two hundred and thirty pounds but is remarkably fast for all that. He is a good man on offense but on defense he has been dubbed "Stonewall Daross." He will be eligible next year and should make a record which will go down in football history.

WALTER "CHULE" MILNER

Milner is a light man who earned his letter by sheer fight. He is a sidestepping specialist and has accounted for much of the yardage gained. He will not be available next year, as he will be lost thru graduation.

WOODROW WILSON

Wilson, when he refrains from being injured, is the best substitute for J. B. Andrews that the squad contains. During the last year he did a good job of signal calling and scored more points than any other man on the squad. His husky shoulders and keen mind will probably carry the burden of calling signals for the next two years.

COTTON DUFFEL

Duffel lettered again in the center position which he has held for the last two years. He is an excellent passer and has a snap judgment which has saved several serious losses. However, his outstanding work has been on defense backing up the line. He has stopped many plays before they got started by sliding under a tangle of players and making the tackle. He will be back next year.

FLWSHEET

HOMER BARNETT

Barnett is a freshman with three years ahead of him. He held the opposite end position from Walker and even this first year the papers mentioned them as the best set of ends on any one team in the state. Barnett is the best pass receiver on the squad and his height and reach will be put to excellent advantage.

SAM CRESAP

Cresap did not letter this last season because he barely fell under the limit required. However, he is a 'varsity back and is a player more than capable of earning his letter. He will be back next year and his position is fully as secure as if he had earned a letter.

JOE HART

Hart is another powerful guard that revels in smearing enemy players whether on offense or defense. In several games where a count was kept he made more than half of the total number of tackles! He will be back to strengthen the team next year.

TONY HERNANDEZ

Tony is a freshman who has several glorious years before him. He is only pint sized but he is as tough as a boot and earned his letter against men who outweighed him at least forty pounds. In spite of his size he does his full share of the work and does it well.

CAMPBELL WEAVER

Campbell, no relation to Carrol Weaver, earned his letter his freshman year and gives promise of being one of the most dependable backs on the squad. His punting on several occasions staved off defeat.

CLARENCE WALKER

Walker is a transfer but has two more years of eligibility at Mines. He played the end position and was only out of games a very few minutes the entire season. He shows prospects of being one of the outstanding ends of the state.

FRED LINGDREN

Lingdren is a transfer from the University of California and earned his letter playing at the ends and in the backfield. He is a triple threat man and is considered by many as the best passer on the squad.

GARVICE POU

Pou was a freshman last season and earned his varsity letter at the center position. He is a tall fast man who will help the team overcome any weakness next year caused by the rule abolishing freshmen players.

ALLEN WILKENFELD

Pecos is a freshman linesman with three years ahead of him. He earned his letter by playing when either Mayhew or Hart were out and it is hoped that he will help fill Mayhew's vacancy.

Resume of 1933 Football Season

TEXAS REDUCES MINERS

22-6

The Miners opened their season against Texas U. dropping a hard fought game 22-6. Wilson scored the sensation of the game by running back a kick-off for ninety yards, presenting the Miners with their lone tally. He and tiny Tony Hernandez exhibited flashes of rare form.

PERUNA KICKS MUCKERS

27-6

The Miners lost to S. M. U. the following week 27-6, although they outfought and held a lead over the Mustangs for the first half. The thirty thousand spectators felt that if Mines had had the breaks they would have won.

HOWARD PAYNERS DISCOMFIT MUCKERS

6-0

In the first home combat of the year Mines showed up poorly in a 6-0 loss to Howard-Payne University. The team could not seem to co-operate.

ORE DIGGERS AND CADETS LOCK HORNS FOR 6-6 TIE

In the fourth conflict, the Miners ditched their losing jinx and held the New Mexico Military Institute (State Champions) to a 6-6 standstill. The game was bitterly contested along all lines with the Mines holding the advantage in first downs and penetrations.

MATADORS VANQUISH MUCKERS

12-0

In this game, played in El Paso, Texas Tech outclassed the Mines to chalk up a 12-0 victory.

This was the first game in which the Miners showed real playing ability even though they came up on the short end.

MINERS SUBJUGATE ANCIENT FOES

9-0

In the annual homecoming encounter against the New Mexico Aggies, the Miners sparked. Deprived of their yearlings in this game, the Muckers used only twelve men and hewed out a score of 9-0. Frequent fumbles marred the game for both teams.

MINES ROUTS SUL ROSS

34-0

In the next strife, the Miners blasted Sul Ross 34-0, using every man on the squad. Woodrow Wilson, Carrol Weaver and Tony Hernandez played stellar roles.

MINES SUBDUES SIMMONS

10-0

In the final contest of the home season the Miners defeated the powerful Simmons University eleven 10-0. In this game Carrol Weaver, bent on putting Carl Pee, the Simmons star, out of the game, succeeded in the first quarter. This was the most pleasing game of the season.

SAINTS NAB FINAL

6-0

In the concluding spasm of the season, played at San Antonio, the Miners knelt to St. Edward's to the tune of 6-0. The game was marred by Captain Mayhew's being accused of slugging and being put out of the game. This game wrote finis to the most disastrous season that Mines has had in the past seven years.

J. B. ANDREWS

ASSISTANT AND BASKETBALL COACH

This year, the coaching staff was valuably augmented by the presence of the Mines' great star quarterback of former years. Andrews should make a real valuable aide to Mack in coaching the backfield. His Freshman team, although inclined to take to the field lightly, showed up exceptionally well in their game with the Aggies Frosh. Also, his basketball team showed up well this year.

Hoch! J. B., to a long and successful coaching career!

E. Perser, B. Travis, W. Milner, H. Cox, G. Pou, F. Hightower, A. Reyes

**WALTER MILNER—Forward—
4th Year**

Chule played his last year for Mines. His play was again characterized by his hustle and scrap. He was honored this year with the captaincy, and his fighting efforts were an inspiration to his team mates.

TOM EADY—Guard—4th Year

Capable and steady, a former captain, who terminated his collegiate basketball career at Mines with four years of hard and conscientious play. He is characterized by his coolness and smoothness, which proved an asset to his play.

GARVICE POU—Center and Forward

Pou was handicapped by illness, which kept him from playing enough to letter. He will be a great help to the team next season, for there are few who can handle the ball in his own individual manner.

BROOKS TRAVIS—Forward and Center—2nd Year

Due to other duties Brooks was a late addition to the basketball squad, but hard work soon made him a valuable man to the ball club. This was Brooks' last year and we all regret the fact that he leaves us after the splendid showing he made this year.

HOWARD COX—*Forward—2nd Year*

Howard was the team's high point man for the season. Besides his ability to hit the basket, Cox is an excellent floor man, and an ideal player for team work. His play was greatly improved this season over last, and another year should make him one of the best in this section.

ALEJANDRO REYES—*Guard and Forward—1st Year*

Alejandro, better known as "Baby," enrolled at mid-term. He was another who could not get quite enough playing time to letter. A quick shot, a good guard, his tricky plays, and flash make him a desirable man at any position.

EARL PERSER—*Forward—1st Year*

Entered at mid-term, and comes from the Panhandle. He promises to be a very capable forward for the coming year. Characteristic of his work was his left-handed shot, and it will make him a hard man to cover next year.

GALE TOLBERT—*Manager*

One of the few managers who showed up for practice sessions. A hard worker, and a great help to coach and team, his efforts to improve unfavorable conditions were truly appreciated.

The 1934 Basketball Season

The Mines basketball team played a schedule of twenty-four games, winning only six during the season.

We all admit a very poor record, but considering the circumstances under which the team and coach had to contend with, much more could not have been expected from them.

These facts have not been brought before the student body, the basketball fans, or the team's supporters. This is in no way an alibi for the team's poor display of their basketball ability, but it is no more than fair to the coach and the men who put their interest and efforts in an attempt to place Miners high in the basketball field and who earnestly tried to develop a winning team, that existing conditions be mentioned.

This was the first year that Mines possessed its own gym, and in years to come it will help greatly in developing players and teams. Due to the fact that this gym was not completed until late in the fall, and equipment such as baskets were not installed until around the first of the year, the team was handicapped from the start.

The first road trip, undertaken the early part of January in New Mexico, found the players in

poor condition, and some of the better players were left at home in order to make up neglected work in their studies.

Illness to several of the players, and inability of others to make their grades necessitated changes in the lineup through-out the entire season. One man, a capable center with height, would have made the Mines Team a much more formidable outfit. Practically every team played controlled the tip off, and had the advantage under the baskets, because of the lack of such a player by the Miners. This was the biggest handicap the Muckers faced this year.

All in all, the season was not successful, but each and every failure was a result of an unavoidable cause.

Next season with an early start, and a number of the squad coming back as improved players, due to the excellent coaching of J. B. Andrews, the basketball team should be able to avenge the defeats of this past season, and rank foremost among the teams of this section. With all the prospects looking good, and the advantages in our favor, let us forecast a successful basketball season for next year.

Forerunner of new systems of power transmission,—the grid glow tube. The principle of the tube is that an immeasurably small current on the grid can control power a hundred million times greater. The tube can handle 900,000 watts, 180 amperes at 5000 volts, and is extremely sensitive to control.

The Executive Council is the representative assembly of the college. Two representatives are elected by class assemblies, and the President and the Vice-President of the Student Association are ex-officio officers of the Council. It is the duty of the Executive Committee to handle all the finances of the student body and to consider matters pertaining to the student body's welfare. The Council holds the governing power over the Student Body.

ALPHA PHI OMEGA FRATERNITY

Bob Estes, L. D. Liles, Max Crawley, Joe Heuser, Will Hamlyn, Bob Swain, B. O. Johnson, Jim Cady, George Krutilek, "Chule" Miller, Colvin McLaren, Woody Leonard, Brooks Travis

Alpha Phi Omega, the oldest organization on the campus of the College, celebrated its fifteenth birthday by entertaining representatives from Chi chapter of Theta Tau early this spring.

In student activities, the reputation of Alpha Phi Omega speaks for itself. A great number of offices in the Student Association have been for many years held by members of the fraternity. The fraternity is well represented on the athletic field. Smokers, banquets, picnics and other informal gatherings supply the correct social atmosphere.

Membership is composed mainly of engineering students, the purpose of the fraternity being to maintain a close connection with the engineering world.

All Sophomore, Junior and Senior Engineering Students.

The Scientific Club is the second oldest organization on the campus of the College of Mines. It is open to members of the Sophomore, Junior and Senior Engineering classes. A Board of Directors, composed of the officers and a representative from each class, govern the policies of the organization.

The club is affiliated with the American Institute of Mining and Metallurgical Engineers and holds a joint meeting with the El Paso Section of this organization once each spring.

One of the major phases of college activities, the upholding and observing of school traditions, is sponsored by the club. These various traditions include the annual Hard Luck Dance, St. Pat's Picnic and M-Day.

In order to gain a closer contact with the engineering world, monthly banquets are held by the club. Men prominent in the fields of Mining, Metallurgy, Geology and other technical lines are guest speakers on these occasions.

The DeMolay Exemplars was formed on the campus of the Texas College of Mines seven years ago by a group of DeMolays. This was the first chapter of Exemplars in the world. It is an inter-fraternal social organization composed of DeMolay members and past-members only.

Being inter-fraternal in nature, the Exemplars clash with none, but support everything that is for the welfare of the College and the student body.

This organization prides itself on being the most active one on the campus. It has carried out a very colorful social year.

The Omega Phi Delta Sorority, which is the oldest sorority on the campus, was founded on March 18, 1925, by Mrs. Kenneth MacCallum.

Mrs. Raymond D. Lorenz is faculty sponsor. Patronesses are Mrs. John W. Kidd, Mrs. Kenneth MacCallum, Mrs. Lawrence Stevens and Mrs. Howard Quinn.

Omega Phi Delta is primarily a social organization, but takes an active part in other phases of campus activities. The Omega Phi's gained campus recognition by the selection of three of their number in the Flowsheet contests. Virginia King was voted most beautiful co-ed, Nell Travis, the most popular and Mary White, All Mines Girl.

COLLEGE PLAYERS

Wray Jonz, Betty Olmsted, Leslie McKinney, Turrentine Jackson, Emily Fruit, Paul Hutchins, Virginia King, John Woods, Jack Jones, Louis Hawley, Ralph Jones, Jean Stevenson, Elicia Fryer, Mary Briggs

The College Players is purely a dramatic organization first established in 1929. Since that time its membership has grown and it has become well-known throughout the Southwest.

Each year in the past has been a big one for the College Players, but in the year of 1933-1934, they have accomplished perhaps more and have been more active than ever before. Membership has increased and their work has been outstanding.

Under the excellent direction of the sponsor, Mrs. W. H. Ball, the Players have reached heights heretofore unattained.

The first play "Dulcy," by George Kaufman and Marc Connelly, started the season off with flying colors. The next major production was "Children of the Moon," a type of play that had never before been attempted.

In a one-act play tournament, sponsored by the Chancel Guild of the First Presbyterian Church, the Players received first place with their offering of "The Undercurrent" while first honors for the best girl performance went to Betty Olmsted, and for the most outstanding male characterization to Harold Heisel.

CO-ED ASSOCIATION

Myra Morris, Gretchen Reinemund, Jane Whitlock, Mildred Farra, Helen Keller, Tula Gates, Mary White, Virginia King, Pearl Louise Wooldridge, Nell Travis, Betty Brand, Blanche Burns, Ruth Stansbury, Eleanor Lyles, Elecia Fryer

The Co-Ed Association, composed of all women students on the campus, had a very active year. Instead of initiating the "slimes" at Slime Gulley, they were required to give stunts for the Co-Ed "Hi-Jinx."

One of the most outstanding events of the Mines' social calendar was the Annual Co-Ed Dance. The Council hopes that the tea, which it gave for the Co-Eds and Faculty, will be an annual affair.

Furnishing the lunch for "M" Day, serving the Faculty and Scientific Club Banquets, and helping with "Inter-scholastic" and High School Days, are some of the ways the Co-Eds have made themselves useful. The Association is refurbishing the girls' recreation room in Kelly Hall.

The "M" Association is composed of all men who have earned their "M" in any major sport. The purpose of the organization is to sponsor and foster athletics of all types. All wearers of the coveted "M" up to January 1, 1933 are considered charter members, and those earning their letters after that time are initiated into the association at the end of each school term. The "M" Association co-operates with the athletic council in every way and the annual Home Coming arrangements are taken care of by this group. The wearers of the "M" represent the highest type of men found on the campus and their exploits in the fields of sport are unrivaled in the Southwest.

The Latin American Club was organized in the Fall of 1927 under the sponsorship of Mrs. Isabella K. Fineau for the purpose of unifying the Spanish-speaking students of the College of Mines, encouraging the use of correct Spanish, and promoting interest in the history and literature of the Hispanic nations.

From a charter membership of nine, the club's enrollment has steadily increased until now it boasts a total membership of thirty-three.

The club has enjoyed various social activities during the past year, prominent among them being several banquets and a picnic at Hueco Tanks.

FORENSIC SOCIETY

Evelyn Lincoln,
Gordon Bulger, Myra Morris, Ralph Jones, Josephine Alton, Paul Hutchins

The Forensic Society of the Mines has a short history but, an active one. Under the sponsorship of Mrs. W. H. Ball Forensic was organized in 1930. During that year various groups debated at Albuquerque with the University of New Mexico team; again in Silver City with the Teachers' College and at Las Vegas, New Mexico, with the Normal College teams.

During the fall and spring terms of 1932 and 1933, Mrs. Ball took Reymond Taylor, Evelyn Lincoln and Carl Parker to Silver City, N. M., where they were victorious on the question of "Tariff." The same year, Reymond Taylor and Carl Parker met Occidental College in a no decision debate.

We feel that 1933 was also a big year for our organization. During April of this year we went to Abilene and placed in the finals of a Southwestern College Contest, which was sponsored by Abilene Christian College and Simmons University.

But, the year 1934, is our year in history. Forensic sponsored an oratorical and extemporaneous contest which was open to the entire school, for the purpose of getting contestants for the Pi Kappa Delta Contest held in Durant, Oklahoma. Winners in the field of oration were Evelyn Lincoln, in oration; Josephine Alton, in extemporaneous speaking; Henry Forbes and Ralph Jones, in men's oration; and Wanda Howard in women's extemporaneous speaking. These five contestants went to Durant, March 8th, a most fruitful trip for the contestants and the College of Mines.

Evelyn Lincoln won first place in women's oratory, against contestants from six states. Ralph Jones went to the finals in men's oratory, and Wanda Howard went to the final rounds in extemporaneous speaking. This trip made the group eligible to a chapter of Pi Kappa Delta, National Speech Arts Fraternity, which we hope to get next year. Evelyn Lincoln, by winning first place in an interstate contest, was made a member of the general chapter, with the degree of honor, which is the highest degree offered. With the material for a national chapter, we hope to see an increase in the speech arts field next fall.

Through the aid and backing of Mrs. B. F. Jenness, the Golddiggers were organized for the purpose of creating interest in the campus activities of the College of Mines. Numbering among their activities a benefit bridge party, appearance at the Mines-Simmons football game in their clever orange and white felt caps, ushering for the Chevrolet Automobile Show, a tea for the new girls at Mid-term, and assisting with the sale of basketball tickets for the College of Mines Athletic Fund, The Gold-diggers hope to continue their work next year as the most active organization on the campus.

He: Do you think it's nice to sneak off into a dark corner and read risqué stories?

She: Naw! It's too hard on your eyes.

• • •

"What would you do if you had five dates with a man and he never attempted to kiss you?"

"I'd lie about it."

• • •

Many a struggling clerk marries because he's tired of struggling.

• • •

"I have no confidence in men."

"Why not?"

"Every time I go to a wild party with some other boy I find my sweetie there with some other girl."

• • •

"Oh, Babe's all right—She'll do in a pinch."

"Yeah, but, man,—give me Nell in a grapple."

Joint Meeting of El Paso Metal Section and Scientific Club

Photo-Engraving--an
Art and a Science

PHOTO-ENGRAVING is an exact science—a process by which printing plates are produced that are accurate, clear-cut, and with wearing qualities that enable them to stand up on the press throughout a long run. . . . But they must have more than mere mechanical exactness; the engraver must preserve the tone of the original, must even be able to emphasize certain features, and hold back others . . . all with artistic feeling for the final result. Such is the process by which good plates are made in El Paso by the W. A. Wall Engraving Company.

Love—The delusion that one woman differs from another.

• • •

Don: Would a kiss be out of place?
Keefer: Not if you know your place.

• • •

"Is she hot?"
"No, but she's consistent."

• • •

Girls who wear cotton stockings are either over-confident or don't give a darn.

• • •

"I could go on kissing you forever."
"Really, and to think it was only yesterday that Father said you lacked application."

• • •

"I kissed her when she wasn't looking."
"What did she do?"
"She wouldn't look at me for the rest of the evening."

• • •

Kind Old Fellow: Don't worry, little flapper, you're no worse than your grandmother was.

Flapper: Yes! That's what makes me so furious.

He: (Boastfully) All the arms I've had around me would reach the moon.

She: Yes and all the lips that have tried to kiss me would drink it.

• • •

Max: "Was it crowded over at the Mex-Tex last night?"

Mac: "Not under my table."

• • •

Nadine: "Do you always practice what you preach?"

Hamson: "I certainly do."

Nadine: "Oh, isn't that thrilling! I hear you're always preaching about sin."

• • •

Tom: "And when you go to the dance tonight will you wear the rose I gave you next to your heart?"

Mary: "I will if I wear something to pin it on."

• • •

Sugar Daddy—Now, come on and tell papa what sort of a line you hand your boy friends when they try to kiss you.

Pretty Baby—Usually the line of least resistance.

• • •

The modern co-ed isn't necessarily so concerned with what a man stands for as what he'll fall for.

• • •

Jean: "B. O. reads me like a book."

Marshall: "What's that on your neck?"

Jean: "Oh, that's a book-mark to show where he left off."

• • •

"I've got to go on a long trip and what wouldn't I give if you were going with me."

"Your right name."

• • •

"Has any girl ever been able to make you stop petting and pawing her?"

"Yes, one of them married me."

• • •

Dean: "What does this mean? I found a bottle of whiskey in your trunk!"

Joe H.: "That means you know whisky when you taste it."

• • •

"Boy, look at the curves on that baby."

"Yes, and does she look hot!"

"How would you like to take her for a ride?"

"Would I like to, and how."

"She's gone for a minute, but she'll be back."

(Voice from side): "All right, ten cents to ride on the roller coaster."

Brooks: "If we appear together around here too much, people will talk about us."

Alberding: "Suppose we disappear together then."

• • •

There's nothing strange in the fact that the modern girl is a "live wire." She carries practically no insulation.

• • •

"Let's have a kiss."

"Not on an empty stomach."

"Of course not. Right where the last one was."

• • •

Four girls were gathered discussing what they expected to do with their lives.

The tall, eager girl spoke first. "My dad's a physician," she said, "and I want to be like him. I'd like to have people call me Doc."

The mild-mannered girl in spectacles spoke: "I want to be like my father, and be called 'Reverend'."

The tanned, muscular girl looked at them and said: "My old man's a lawyer, and I'm out to earn the title of 'Squire,' too."

The fourth girl, an unusually thoughtful, ambitious looking person, sat in her corner and said nothing. The other girls rushed over to her. "Come on, now," they urged, "tell us what you want to be."

"I guess I won't want to be like my father," she answered. "You see, he's just an ordinary layman."

• • •

We may as well let it be known that some gay Lothario was seen coming into the Ware house at 6:00 a. m. We assume that the date was a good one.

• • •

Dear Son:

I just read in the paper that students who don't smoke make much higher grades than those who do. This is something for you to think about.

Love,
Father.

Dear Father:

I have thought about it. But truthfully, I would rather make a B and have the enjoyment of smoking; in fact I would rather smoke and make a C. Furthermore, I would rather smoke and drink and neck and make a D.

Love,
Son.

Dear Son:

I'll break your neck if you flunk anything.
Your Father.

A SUGGESTED TOAST

The great Southwest, where men are men, women are women, and both realize the difference.

• • •

Andy Z. confided to me that he had found the ideal thing right here in town the other day—quick on the pickup and slow on the brake.

• • •

"Curse it! Curse it!" hissed the villain, snatching at the fair maiden's waist.

"No, it ain't either," she retorted, "It's a girdle."

• • •

Bob Estes: "Do you do repairing here?"

Garage Owner: "Yeah, but we don't do manufacturing."

• • •

Cow-ed reports that an empty stocking may bring gifts on Christmas day, but a well filled one brings them any day.

• • •

It's fun to go on picnics these days, providing you can find a shady spot where the grass is green and the girl isn't.

• • •

Many parents never get to see the marks their daughters make at college.

• • •

"Father, you were born in California, you say?"

"Yes, my son."

"And mother was born in New York?"

"Yes."

"And I was born in Indiana?"

Yes, my boy."

"Well, father, don't it beat the Dutch how we all got together!"

• • •

"Here," said the salesman, "Is something we call the 'Lovers' clock.' You can set it so it will take two hours to run one hour."

"I'll take that," said Edith, "And now, if you have one that can be set so as to run two hours in one hour's time or less, I think I'd like one of that kind, too."

• • •

A bashful young couple, who were evidently very much in love, entered a crowded street car.

"Do you suppose we can squeeze in here?" he asked, looking at her blushing face doubtfully.

"Don't you think, dear, we had better wait until we get home?"

• • •

1st Grad.: "How did you get your Master of Arts?"

2nd Grad.: "I got it from being a master of the art of drinking, the art of kissing, and the art of dancing."

• • •

Charlie K.: "You kiss me like that again and you'll be sorry."

Mildred O.: "Yes, sorry I didn't start doing it a month ago."

• • •

Gretchen: "Did you say I'm a kisser of the wicked variety?"

W. Wilson: "No, I said you're a kisser with a wicked variety."

• • •

Wray J.: "Statistics prove that ninety-nine per cent of the girls who join nudist camps are well built."

Frances J.: "Are you sure of that?"

Wray J.: "Well, figures don't lie."

• • •

A. O. W.: "Honey, you made a big mistake by letting Jack fool around with the straps on your bathing suit."

Jeanne H.: "Yes, it was my undoing."

• • •

Jeanne: "If you had your choice of all the men on the campus, which one would you prefer?"

Zora: "The one who could get there quickest."

• • •

"How in the devil does a girl in a nudist colony pocket her pride?"

• • •

Lee M.: "Do you know any foreign tongues?"

Bob F.: "No, I only go out with American girls."

• • •

Wilma: "How about appearing as Lady Godiva at the Costume Ball?"

Frances K.: "Oh, I couldn't. I'd be embarrassed to death."

Wilma: "You mean you'd be ashamed to expose yourself?"

Frances: "Oh, no, I mean I don't know how to ride a horse."

Cotton: "After all, darling, kissing is no killing matter."

Annie Lou: "Oh, yes, it is. The way you kiss is killing all my inhibitions."

• • •

Jeanne: "Until I said no to his proposal, my boy friend was all steamed up about me."

Bill M.: "I suppose that cooled him off."

Jeanne: "No, it burned him up."

• • •

Clarence W.: "I'd give my right arm for a girl like you."

Mary K.: "Sorry; I want a man who'll give me both his arms."

• • •

Ellen D.: "Kissing is great fun; there's no two ways about it."

Jack M.: "No two ways! Honey, there are at least a hundred and fifty!"

• • •

Harrison H.: "Baby, would you like to see me do a few sleight-of-hand tricks?"

Nadine H.: "No; I expect you to behave like a gentleman."

• • •

Argyra: "I took a bath last night before three men."

Alan: "Gracious, weren't you ashamed?"

Argyra: "Yes, Dad and my two brothers were all waiting to take theirs."

• • •

Jean: "Last night I told my husband all about my past."

Alan: "And what did he say?"

Jean: "That he wished he'd known me sooner."

• • •

Charles N.: "Have you a book called 'Man, the Master of Women'?"

Nell: "You'll find fiction on the third shelf back."

• • •

Some girls let any fool kiss them; others let any kiss fool them.

FLWSHEET

And mothers still wonder where their sixteen-year-old daughters learn the things they knew at the same age."

Jokes Ed.: "Say, Benny, I've got an original joke that —"

Editor: "Okay, Zo, but you don't look that old."

Everyone of my sorority sisters knows at least fifty ways of kissing, but there isn't one of those girls fool enough to try 'em all on the same man.

Brooks: "Let's give the bride a shower."

Al.: "Count me in; I'll bring the soap."

On a particularly cold evening when a co-ed told her B. F. she intended to wear her heaviest clothes, he replied, "Ah, an ounce of prevention."

Father: "What's that young man doing here at this hour?"

Daughter: "He's doing fine, daddy."

She: "Once when I was in night school the teacher told me to stay."

He: "Did you do something wrong?"

She: "No, I didn't stay."

Argyra: "Don't you think I have a kissable mouth?"

Alan: "Yes, you certainly have, when you get right down to it."

"Did that course in English help your boy friend any?"

"Not a bit. He still ends every sentence with a proposition."

There was the absent-minded professor's wife who found the professor kissing one of his prettiest and youngest students, and she laughed and laughed because she knew the professor was so absent-minded.

Stranger: "I represent a society for the prevention of profanity. I want to take profanity entirely out of your life and —"

Mrs. Moses: "Hey, Leon, here's a man who wants to buy your golf clubs."

Bob F.: "Leslie is all the world to me. What would you advise me to do?"

Gil Y.: "See a little more of the world, old thing."

"How did Doc. Smith make all his money?"
"Oh, in the stork market."

They call her "Checkers" because she always jumps when you make a bad move.

"Shall we go outside for a little walk?"

"You boys have the funniest way of saying what you mean."

Some of our older students give fervent thanks that they lived in the days when you could kiss a girl and taste nothing but girl.

"Your studies are suffering, son; do you need a coach?"

"No, dad, a roadster'll do."

Those Miners weren't tight—they were merely playing war, using the curbstone as a fortification.

[Faint, illegible handwriting]

FINIS

AS USUAL, we have tried to make this 1934 Edition the best ever issued. However, we urge the students to take all things into consideration when judging their 1934 "Flowsheet." We are not apologizing for our work, since we think we have done the best that could have been done under the circumstances; but we *are* apologizing for the attitude of the student body.

The annual is smaller than last year's book, due to lack of co-operation from organizations and individual students. It is also late, for the same reason. The self-centered attitude of a large number of students in the present student body is a heavy handicap to any effort which calls for concerted interest. College spirit, if it is to flourish on a mutual basis in a successful annual, needs co-operation from all.

We breathed a sigh of relief last year and the year before. Each time we thought we were through with the struggle of trying to issue an annual in the face of torpid lack of interest. Conditions this year are so much worse that it is with real thankfulness that we lay down our burden. WE ARE OVERWHELMED WITH JOY THAT . . . IT . . . IS FINISHED!

We earnestly entreat the students to give their wholehearted support to Will Hamlyn as he takes up the work next year. We wish him luck (he needs it) and hope that the students will help him make the success for which we have striven.

Let us make one last plea for next year's editor. Take an interest in your school, and in its annual by which it is known. Be prompt, cheerful and reliable when asked for your co-operation in issuing the 1935 "Flowsheet."

Remhard V. Mack Jr.

Editor-in-Chief, 1933 and 1934
