Dr. Dysart E. Holcomb with his wife and four children came to Texas Western in the summer of 1955. Dr. Holcomb, well-qualified for the position of President, attended Texas Tech from 1933 until 1937, where he earned a Bachelor's Degree in Chemical Engineering. He then went to the University of Michigan until 1941. In 1938 he received his Masters of Science Degree in Chemical Engineering and then his Doctorate in Philosophy.

Dr. Holcomb finds time now and then to play a few holes of golf. He is also interested in woodworking. Since coming to Texas Western, the President has taken an interest in lapadery, the art of metal work and jewelry making.

Dr. Holcomb hopes to make Texas Western one of the outstanding schools in the Southwest. He said, "the raising of academic standards cannot be done overnight, but there must be a gradual increase in the minimum standards of the school. Although the size of the school is of no consequence, there are definite needs for the expansion of physical facilities. A critical need exists at the present time for a large classroom building and an office building." Dr. Holcomb says that the construction of these buildings should begin in 1958.

PRESIDENT HOLCOMB CONGRATULATES MAJOR GENERAL ROBERT WOOD ON HIS COMMENCEMENT ADDRESS

President of Texas Western

DR. DYSART E. HOLCOMB

To Dr. John L. Waller, Dean of the Graduate Division, we dedicate this 1957 Flowsheet, in gratitude for the service he has rendered this school and its students for the past twenty-five years.

Dr. Waller has taught since 1906, except for time out for graduate work and overseas duty in World War I. He came to Texas Western in 1931 to serve as Chairman of the enlarged Department of History and Government, when the college was authorized to offer a Bachelor of Arts degree. In 1940, when the Graduate Council was established, Dr. Waller was made its first chairman. Since that time he has served in this capacity.

We of the Flowsheet are proud to present this annual to this man who has been an integral part of Texas Western's growth.

DEDICATION
DR. JOHN L. WALLER
DEAN OF GRADUATE DIVISION

HISTORY OF TEXAS WESTERN COLLEGE

El Paso's own college was created in 1913 as the College of Mines and Metallurgy by a legislative act. This act charged the institution with teaching and research in mining and metallurgy and allied subjects and placed it under the control of the University of Texas.

The school opened in September, 1914, in the building of the former El Paso Military Institute, which was donated by the city of El Paso. In 1916 the main building burned, resulting in a decision to move to the present site on the west side of Mount Franklin. The Legislature voted an emergency appropriation of \$100,000 for new buildings.

The name was changed to Texas Western College on June 1, 1949, to recognize the expansion of the curriculum into various fields.
