Texas Western Miners  
Texas Western College  
El Paso, Texas

Dear Miners:

To guide you through the 1959 Flowsheet, we present to you T. N. T. O'Kelly, the one-eyed little miner who is familiar to all of us. We of the staff sincerely hope that you will find some of your favorite scenes within this book.

Innovations in this annual include the use of color on the division pages, more copy, the entirely revised arrangement of the sections, and the first four-color cover in the yearbook's history.

We wish to express our sincere thanks to Mr. Kazin K. Kazin and the Fine Arts Studio for taking the outstanding faculty, class, honorary, and some of the club pictures. Also, we wish to thank Mr. Ralph Lowenstein and the Student Publications Division Photography Staff for making most of the other pictures in this book. To Guynes Printing Company, we wish to extend our appreciation for their assistance and co-operation.

The staff cannot express to the faculty and the Student Body its gratitude for the understanding and help in compiling this record of the school year.

Last, but not least, we, the staff, wish to thank our enthusiastic advisor, Mr. John Middagh, who has encouraged our endeavors to make this edition superior to any in the Flowsheet's history.

May this Flowsheet be your guide in remembering the 1958-59 school year.

Yours truly,

*Elaine Hanna*

## FLOWSHEET DEDICATION OF 1959

His services and contributions to Texas Western College began in 1927 when the college, then Texas College of Mines, was founded. During his thirty-two years here, he has more than adequately filled the positions of Assistant, Associate, and full-time Professor in the Science Department.

Born in Richwood, Ohio, he attended Richwood High School before entering Ohio State University, where he received his Bachelor of Science Degree in chemistry and physics. In 1921 he received his Master of Science Degree in chemistry and math, and in 1941 he obtained his Ph.D in chemistry and math from the University of Chicago. Since then he has had several articles published in scientific magazines.

He served as the assistant in the Department of Pharmaceutical Chemistry at Ohio State University from 1912-13. He holds membership in Sigma Xi, Phi Lambda Upsilon, the American Chemical Society, Fellow American Association for the Advancement of Science, and he is a member of Sigma Phi Epsilon Social Fraternity. Before entering the Education field, he was the chemist for the National Carbon Company in Cleveland in 1913, and then from 1913-14 he served as the Chief Chemist for the William Edwards Company also in Cleveland. He has enjoyed experimenting with the effects of certain chemicals upon the soil and plants.

Our honoree married Grace Harris in Shreveport, Louisiana. They have a daughter, Frances Ellen, who attended Texas Western College, and is now married and living in El Paso.

As most of you have concluded by now, the Flowsheet Staff dedicates its 1959 yearbook to *Dr. William Walter Lake*. Dr. Lake's contributions to Texas Western and to the scientific world have been great. Our college is indeed fortunate to have on its staff such an outstanding person.

DR. WILLIAM WALTER LAKE

Office of the President

# Texas Western College

OF THE UNIVERSITY OF TEXAS

January 13, 1959

at El Paso

I should like to extend sincere congratulations to the Editor and staff of the Flowsheet for 1959 for an outstanding accomplishment. This handsome volume will serve in future years to remind all students who were here in 1958-1959 of highlights of personal progress, of loyal friends, of stimulating associations. And we hope the Flowsheet will serve to keep alive your interest in Texas Western College. We shall continue to rely upon your support and your understanding. To each of you go my warmest wishes for success and happiness in the years ahead.

Faithfully yours,

J. R. Smiley  
President
